Markets Served

Service Providers

Data Network Providers, Data Resellers, Managed Service Providers, and Competitive Carriers require a platform like gpxcloud for the ongoing lifecycle and cost management of their data networks and vendors.

Telecom Expense Management Providers (TEMs)

TEMs need invoice data retrieval and reader automation for immediate visibility to their client's telecom spend.

Enterprises

Enterprises need self-service TEM solutions to provide data and automation to manage their IT/telecom vendor costs and timely invoice payments.

Key Metrics

- Operating for 17+ years supporting clients with global needs
- No debt and operating as cash flow positive
- Invoice data retrieval, reader, translation and normalization in global currencies with VAT assignment
- Hundreds of proprietary electronic vendor invoice readers for EDI, PDF, and other invoice data files across Wireline, Wireless, Collocation, IaaS, and UCaaS services
